TO WHOM IT MAY CONCERN

Dear Sirs,

RE: EUROTECH SECURITY SYSTEMS PLC

We at Moore Stephens take our security requirements very seriously and therefore assess our potential security companies with great care.

Having used some of the very large national companies in the past, I must say that we were not happy with the level of service and response we received from these companies. It seemed that the high level of service we required, simply did not exist in the security industry.

Fortunately, one of our other suppliers (non security), recommended that we contact Eurotech and I invited their Managing Director, Mr Peter Alligan to come and visit us.

I threw every problem that we had to Peter Alligan and he responded with a viable solution for each one. Mr Alligan went on to promise us of a level of service that we had always expected but never received

Being a sceptic, I gave Mr Alligan and Eurotech only one chance to get it right and they most certainly did.

Thus, today, Eurotech looks after all 12 of our premises and I must say that we have never been let down by them and indeed have found Eurotech to be very professional, pro-active and certainly know how to look after their customers.

We would therefore have no hesitation in recommending Eurotech Security Systems Plc to any other company if they seek a high quality professional service.

Yours sincerely,

Dear Peter

Security System and Door Entry System

Thank you for your letter dated 26th March.

I write to express my thanks for the way in which both you and your engineers handled the installation of our security and door entry system.

The work was carried out in the most professional manner. Your engineers did all their work to our convenience and without interruption to business. I would have no hesitation in recommending the services of your company.

Once again, many thanks for your help and assistance.

With kind regards.

Yours sincerely

Dear Peter,

Thank you for your recent letter to my colleague regarding a reference for the services your company has provided.

Your company has provided for us an alarm monitoring system for our Megastore window display, this is a vital piece of security hardware for us as it protects our trophies which the players have worked so hard to get. The work carried out by your company, with regards the fitting was carried out swiftly and professionally and to date we have had no problems with the system.

I hope this covers what you wanted to some degree, I cannot say a great deal more as this has been the only work carried out to date by Eurotech, if anything else is needed I will give you a call.

Yours sincerely

Intruder, Fire & Emergency Lighting Systems

Communications congratulating performance are not given lightly by me, in this case I consider one is appropriate.

Work carried out at Packbourne's units 10 and 11 finished on time, with minimal disruption to our business. The project was approached and executed with professionalism. Potential obstacles were foreseen and dealt with to my complete satisfaction.

Re: Eurotech Reference

This is to confirm that I have known your company for about 20 years, and have used your security systems on most of my projects, with great success.

As you know, we do mainly domestic refurbishment of old (or historic) buildings, all the projects restored and decorated to a high quality finish.

My clients have been very satisfied with your equipment and back-up services i.e. burglar alarms, smoke detectors, entryphone systems etc.

Yours sincerely,

Re: Reference - Eurotech Security Systems Plc

Salco is a multi-million pound business, distributing stock around the UK from our warehouses and therefore electronic security systems play an important role in the security our business and products.

Recently, we opened our first and quite large retail outlet and we invited Eurotech Security Systems Plc to offer there advice and quotations.

We were met by their Managing Director – Mr Peter Alligan who advised on our Intruder Alarms and CCTV requirements. The quotations submitted offered quality systems, but importantly great value for money.

Eurotech installed the systems without any fuss and it was a very good and professional installation. Eurotech linked the new store CCTV into our corporate offices systems using the Internet, so we can view our CCTV remotely.

Eurotech also installed a "People Counter" using special CCTV cameras and software so we have remote analytical information about the amount of persons in our store and at what times, giving us vital retail and sales information.

Our systems are regularly serviced by the same Eurotech service engineers and we like that because we have built up such a trust with the Eurotech Team.

Based upon the information above, we thoroughly recommend Eurotech to anyone that expects quality systems, services and importantly.....value for money

Yours sincerely

Re: Reference - Eurotech Security Systems Plc

We have been using the services of Eurotech Security Systems Plc for over 5 years and they have installed new systems for us. They also maintain and respond to our Intruder Alarms, Fire Alarms and CCTV systems - at our offices, warehouses and private homes.

When we call Eurotech, we are always greeted by courteous staff and in this day and age it's nice to speak to individuals and not by answering machines with options.

When Eurotech engineers arrive at our premises, they are always on time, well presented tidy workers and keep us informed of the works carried out.

We would therefore have no hesitation in recommending Eurotech Security Systems Plc to any other business or private home.

F.T.A.O. Mr Peter Alligan – Managing Director.

Dear Sirs,

RE: SECURITY SYSTEM INSTALLED – AT ABOVE PREMISES.

On recommendation we approached Eurotech Security Systems to advise us on our security throughout our offices, yard, and enclosed garage space, and were so impressed by the amount of help, and advice received, that we have had installed a Security system to cover all the above mentioned aspects of our business.

The system was installed with the minimum amount of disruption, by a group of Professional Engineers, and within the time schedule agreed.

In view of the above we would not hesitate in recommending Eurotech to any Business, or home owner wanting peace of mind when leaving their premises.

Yours faithfully,

Peter O'Neill.

Re: Reference - Eurotech Security Systems Plc

Associated Lead Mills is a multi-million pound business dealing with precious metals and security systems play an important role in the security of the safe keeping of our business.

We use the services of Eurotech Security Systems Plc for CCTV and the control of our physical gates and locking systems.

Overall we have found Eurotech to be efficient and cost effective and we have further recommended them onto our other suppliers and colleagues.

Eurotech have recently installed a perimeter alarm system for us so that we are aware of possible intruders before they can even think about breaking into our premises, therefore giving us time to respond to a threat as opposed to dealing with a break in.

In addition, we have many Eurotech engineers working in our homes and business premises and they are all polite, professional and get the job done on time and within our agreed budgets.

Our systems are also regularly serviced by the same Eurotech service engineers and we like that because we have built up such a trust with the Eurotech Team.

Based upon the information above, we thoroughly recommend Eurotech to anyone that expects quality systems, services and importantly.....value for money
